

Ring Sizing Instructions

Revelation 19:7 (NIV)
*Let us rejoice and be glad and give him glory!
 For the wedding of the Lamb has come,
 and his bride has made herself ready.*

HOW TO MEASURE YOUR RING SIZE:

The most accurate way to determine your ring size is to go to your local jewelry store and ask for a courtesy finger sizing.

Follow the directions below to measure your finger using the string method. The most important thing to remember is that if the ring is a little larger, it can still be worn, but if it's too small you won't be able to get it past the knuckle.

The Lord's Ring comes in full sizes. If you measure for a half size please order a ring size up.

How To Measure Your Finger (String Method)

- 1) Find a piece of string or strip of paper about 1/4" in width.
- 2) Wrap it around the base of the appropriate finger.
- 3) Use a pen to mark the point on the string/paper where it overlaps, forming a complete circle.
- 4) With a ruler, measure the length from the starting end of the string/paper to the pen mark.
- 5) Use this measurement and the chart to the right to determine your ring size.
- 6) Repeat steps one through five for greater accuracy.

Tips For Measuring Ring Size

Here are some tips to make your ring size measurement more accurate:

- 1) Make sure the measurement you choose easily fits over your knuckle.
- 2) Measure when your hands are warm, not cold.
- 3) For the most accurate reading, measure the finger at the end of the day when the finger is the largest.
- 4) When measuring, keep in mind that each finger could have a different size, so don't presume that a ring that fits your left ring finger will also fit your right ring finger.
- 5) Ask a friend to help measure your ring size.
